Hi Sandra
Here is the document for the BSAI partial.

As I mentioned in the kickoff, I'm also going to suggest that Jim provides a second "link" to the same information contained on my [github here](#). If you get a chance to confirm that the link works for you, that would be great! Just want to get people thinking about potentially streamlined ways of presenting this information.

In theory, if the PT ends up liking the website approach, it'd be easy to make templates for folks to drop in info from their partial assessments and have them fully updated.

This was generated completely using code start-to-finish so I will appreciate your eyes for any formatting issues.

Welcoming your edits,
MK

Hi Maia,

Nice job! I just had edits for clarity. I suggested leaving out some detailed text which could be addressed in the full assessment. I appreciated your attention to detail and the nice write up. Please don't hesitate to ask questions, I'm likely to have got some things wrong!

Sandra

Hi Sandra

Thanks for getting this to me so quickly!

I will make these edits and pass along the draft to Jim. Were you able to see whether or not the link worked (in my first email?)

Just confirming that **only** the full GOA FHS info should go into the director's briefing PPT, and that we plan to use the version on the drive [here](#)? (I have it in my calendar that the briefing is coming up on the 2nd so didn't want to fill in the wrong place. Let me know if I should ask Jim instead.)

I'll let you know if I have any questions.

MK

Hi Maia,

Oops, I meant to tell you the link works and I think it's great! As for the briefing, yes, just the full assessments will be discussed. I have to admit Chris and I haven't been keeping up, but we will turn our attention to the briefing and get more information out to staff.

Thanks for all your work.

Sandra

No problem, thanks for double checking. OK, I will look out for an update about the briefing. Have a great weekend!

Hi Sandra

Sorry for the delay in getting back to you - just wanted to provide a written response to a few of your comments for both of our memories' sake.

I plan to turn around the finalized document to Jim today and will CC you.

- 1) Regarding the recruitment time series: I have removed the sentence which discussed how adjusting the time series would impact the assessment.
- 2) Confusion re: "base model" -- I used this term for the last full assessment (from 2020). For ease I am deleting mentions of this, but want to confirm that the *projection* model indeed has catches for future years. 2021 EBS/AI survey data will be included in the next full assessment model.

Thanks

MK

Thanks Maia. Nice job, and that's great that you are ready to turn in your document. Also, I saw flathead sole in the briefing ppt., that's excellent. It's spot on for a briefing.

Sandra
